SUMMER MAINTENANCE

Water Tanker is designed to transport and transfer water for the purpose of drinking or use. Drinking water distribution, highway cleaning with pressurized water or fire fighting can be given as examples to areas of use. It can transfer the water in its tank with the help of a hydraulic pump.

The front sweeper is a functional and economical device that can be used in landscaping works, municipal cleaning services, road cleaning in winter after highway works. It offers a practical usage service due to its easy use, assembly and disassembly functions. Depending on the power capacity, purpose of use and road conditions of the vehicle to be used, it is manufactured in appropriate lengths and features.

100%
MADE IN ALBANIA
